

Today's air quality forecast is

YELLOW

Air quality is acceptable; however, for some pollutants there may be a moderate health concern for a very small number of people. For example, people who are unusually sensitive to ozone may experience respiratory symptoms. Take action to reduce transportation-related emissions.

- Carpool or vanpool for the work commute.
- Use the bus or MetroLink whenever possible.
- Avoid vehicle idling.
- Walk or bike for short trips.
- Visit MoDOT's Gateway Guide website at www.gatewayguide.com for real-time traffic information to plan your route to avoid traffic tie-ups and construction zones.
- Combine errands into a single trip, rather than making multiple short trips that release more pollution into the air.
- Brown bag lunch rather than driving to a local restaurant. Short car trips release more pollution into our air.
